

ROBETA

feel the difference

*In truth there is no simple answer
why the thing we instantly miss in any other campervan
is the fundamental building block
of our campervans.*

*Maybe it because perfection is in our veins
or because of our dream and unstoppable desire
to build the ultimate campervan.*

*We might never know, but what we know is that
once you've driven our van you will never forget it...*

and you will never get over it.

What drives us?

*Is it the relentless need to outdo ourselves
or is it our basic instinct that guides us
to go one step further?*

*In truth there is no simple answer,
there is only the fact that we will always
strive to be the best,
but we will never believe that we are.*

We are obsessed with perfection, everything matters.

*Because we live in a world where everything is shaped and designed
so it can be mass produced. Simplified in order to be produced as quickly
and as cheaply as possible.*

*Made to appeal to as wide of an audience as possible.
Conceived to not stand out in any way.
To be so beige that you can't really hate it or love it.*

*There are some companies that are not afraid to be different.
Who strive to stay out of the clutches of mediocrity and want to change the world.*

We are one of those companies.

We are Robeta and this is our story.

WHAT MAKES US DIFFERENT?

Our success is the result of a constant commitment to quality, product innovation, and care for our customers.

Every Robeta product is created and built based on the idea of creating leisure vehicles that stand out from the crowd. Vehicles that strive for the highest quality and outstanding designs.

Innovation is in our DNA, which is why Robeta's goal is to present customers with a new, different, and above all innovative experience of traveling with a campervan. Our company pays special attention to functionality, form, and comfort. We are constantly learning, observing our surroundings, and carefully planning our next steps. We start building each concept with a careful combination of ideas coming from our R&D team, management team, sales team, and most importantly - you, our customers.

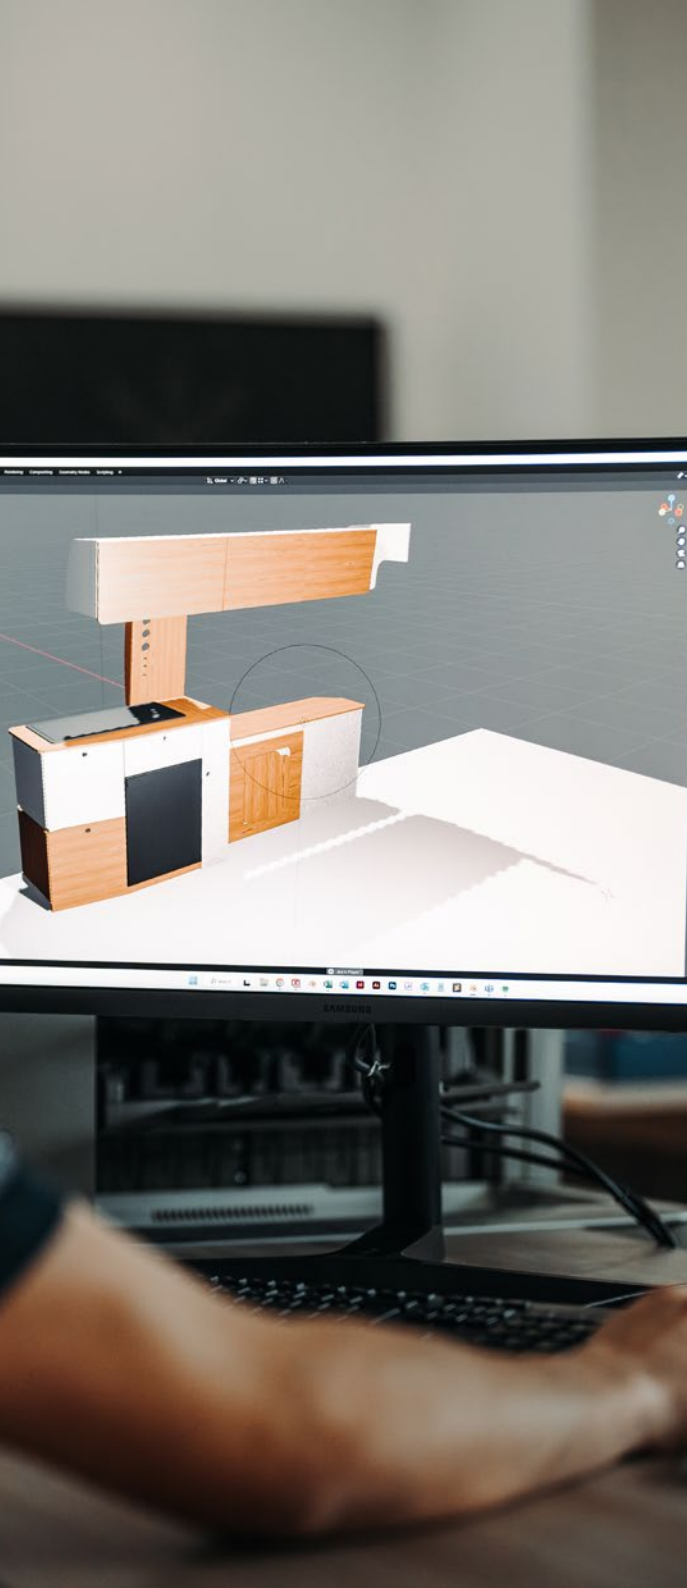

ABOUT US

Robeta was founded in 2011 with the vision of creating something new. Our products belong to the highest quality class in the category of vans, where we rank among the top 3 manufacturers in Europe. A company with a mission to combine passion and comfort.

The first steps of Robeta were wrapped in work for other well-known manufacturers, so at first, the company designed the interiors of other vehicles. Then we took a step forward and started developing our first models. Now we can satisfy even the most demanding customers with our offer.

FEEL THE DIFFERENCE

At Robeta, you can feel that it is simply different as soon as you enter the vehicle. The interior is rounded into a perfect whole, thanks to its modern design, innovative and creative ideas with an emphasis on playful details. We pay special attention to the use of high-quality and sustainable materials.

PRODUCTION

Our production process works with an emphasis on the smallest details of the vehicle, as well as the selection of quality materials. We believe that every little thing is a crucial part of the final product. Regardless of whether you are looking for a vehicle for trips to European capitals, trips to the mountains, jumping into the sea or if you want to drive off the beaten path - our vehicles will meet your expectations in every desire.

The development of each model, from the initial idea to the final product, takes place in Robeta. The design and creation of your new Robeta happen on several levels. The entire process is monitored and controlled by a competent professional team. The idea of a new journey and an indescribable adventure is the basic idea for our new vehicles, which are then drawn by our designer.

Throughout the process, we add fresh ideas and innovations to create the perfect new vehicle for you. Our carpenters manufacture furniture for Robeta vehicles using state-of-the-art CNC machines.

The carved segments of the furniture are then manually assembled and shaped into a whole by our installers. Each vehicle goes through multiple final quality checks at the end. In each Robeta, you will also find a personalized plate with the handwritten signature of the fitter who assembled the camper.

We hereby guarantee that your campervan is made with care, precision, and love.

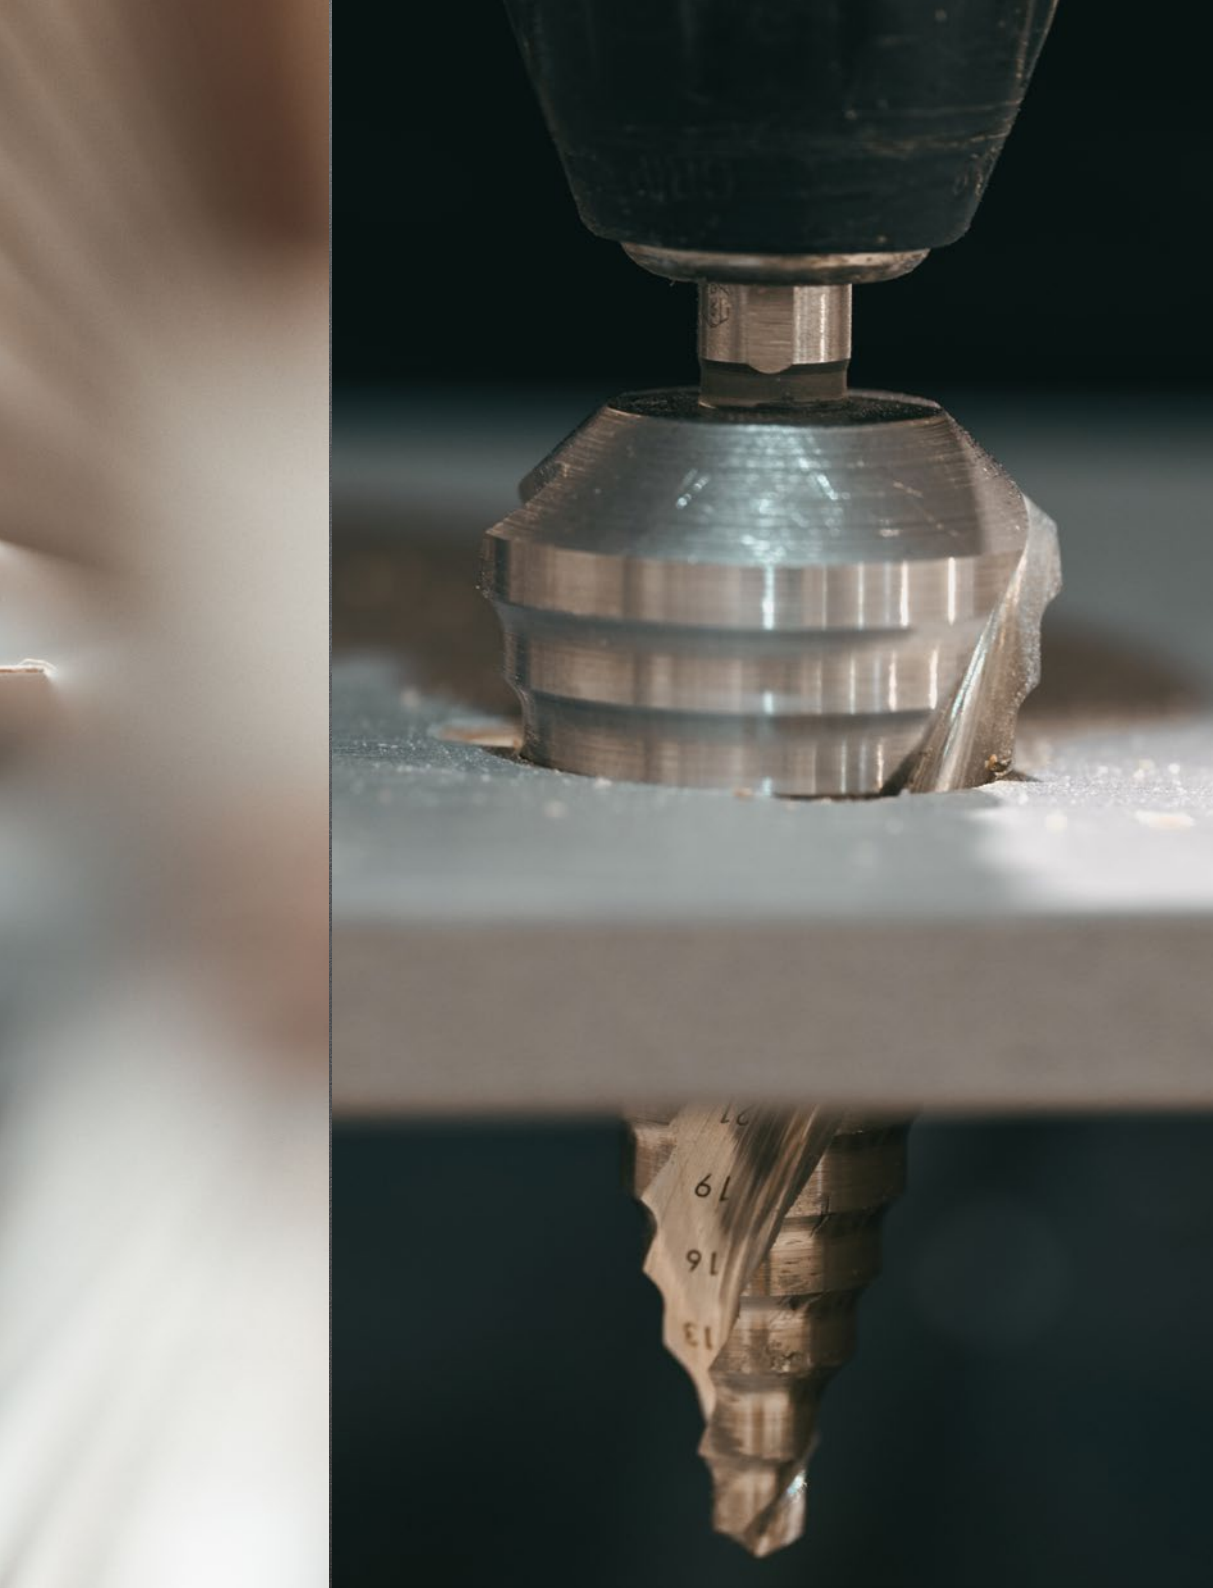

QUALITY

The selection of quality suppliers and components is an integral part of our process. We are always careful and selective when choosing because we want to pick only those that will upgrade, complement, and improve our level of campervan production. We want to produce only the best for our customers and choose the highest quality materials. We can only guarantee this by choosing the right suppliers, who are an important part of the process and the final product.

We pay special attention to the quality of materials and raw materials, so you can find only the best in our vehicles. Armaflex insulation (25 mm thick) ensures a comfortable indoor climate both in summer and winter. The entire furniture is coated with 0.6mm HPL, which ensures scratch resistance. The insulated vinyl floor and the walls and ceiling of the vehicle, which are carpeted in eco-leather (also scratch-resistant), also enable Robeta to be durable in ensuring non-wear.

The sum of everything makes our Robeta a trustworthy and pleasant long-term companion in everyday life.

AIR FURNITURE

New revolutionary furniture, that brings down barriers to campervan travel.

Converted campervans with a lot of luggage and a full gas tank, can very quickly reach the limit of the permissible weight and mass of the vehicle. In the segment of campervans, the maximum permissible weight is 3.500 kg. With conventional furniture and various combinations of equipment, we can limit and exceed 3.500 kg very quickly. The additional weight also means higher fuel consumption and bigger CO² emissions.

At Robeta, we found a solution: We make furniture from the stable material of recycled plastic and still maintain our quality.

Result: Up to 220 kg less weight of the basic vehicle than with conventional furniture. With the new AIR furniture, we can combine a wide variety of combinations: 4x4 drive and an additional retractable roof.

Friction in furniture, which in turn means unpleasant sounds and loose screws, has thus become a thing of the past. AIR, with its 2x lighter weight than other furniture, represents lightness and the future

ROBETA SCHUMACHER EDITION

A revolutionary vehicle that goes beyond the ordinary. A motorhome that is more than just a companion on trips and long journeys. A vehicle that, with its innovative and modern interior, is reminiscent of prestigious yachts. All this describes our new Robeta model, which was created in cooperation with the former F1 star – Ralf Schumacher.

"Robeta Schumacher Edition" became the first luxury vehicle in the motorhome category. The project, which lasted more than two years, is the result of making compromises, following Schumacher's wishes, and finding the best solutions on the market. Every little detail and little thing inside the vehicle is finished to perfection and provides comfort that is comparable to hotel rooms. The overall appearance, equipment, and furniture are on a completely different level than what we know from average motorhomes.

During the creation and design of the motorhome, we followed the guidelines from the nautical segment of prestigious yachts and added the latest and most powerful electronics.

SCHUMACHER EDITION

AMONGST THE ELITE

In addition to high-quality materials, prestigious furniture, and the latest innovative solutions, you will also find quite a few outstanding accessories in the vehicle, which raise the travel experience to a higher level.

Throughout the motorhome, you will find as many lights as the average apartment building. These are very special lights with light-emitting diodes that emit the kind of light that improves the mood and ambiance of the passengers. It is a proven technology that, last but not least, also brought us an award at the local level.

The sound or audio equipment of the vehicle also deserves special mention. The motorhome is equipped with a revolutionary JL Audio sound system.

THE INTERIOR

The interior of the vehicle is a perfect blend of innovation and incredible development advancements. We devoted the most time to the selection of materials because, at Robeta, quality always comes first. The entire vehicle is a reflection of cooperation, consideration of wishes, and at the same time awareness of the limits of the impossible.

THE KITCHEN

The kitchen is full of hidden corners, drawers, and storage surfaces that allow storage and preparation for every occasion. In it, you will not only find a modern induction stove, but also a dishwasher and a wine refrigerator.

THE BATHROOM

Despite the limited space, the bathroom is surprisingly large. It stands out with its practicality and luxurious touch. It has a private shower with a glass barrier, a black sink, a ceramic toilet, and a large illuminated mirror.

THE BED

In the vehicle, you will not find a classic bed, but a lift-up bed that adapts to the roof of the Mercedes over the middle part of the vehicle. Its special feature is that it is the only series-produced bed that moves vertically and extends horizontally, both with the help of electricity, to the desired dimensions, a length of 200 cm and a width of 160 cm. In addition, the bed is also "floating," which means that it is attached to the ceiling structure of the vehicle only with four-point steel cables without additional guides or supports.

THE NEW ADONIS

The New Adonis model on the Mercedes Benz chassis with its length of 5.93m and standard engine power of 190PS represents the very top of the Robeta model fleet. Is synonymous with luxury and prestige and on the other hand, due to its compactness, innovative ideas, and utility, it is an ideal partner both for everyday use as well as for long adventurous trips.

Despite the length, which is slightly less than 6m, the vehicle is designed for traveling and accommodation for 4 people and is an ideal choice for anyone who wants something more every day. The Adonis model is already fully equipped and configured, as far as the chassis is concerned, it has all possible equipment that can be supplied by Mercedes Benz; from the top audio navigation system to all possible assistance and safety systems (Blind Spot, 360-degree camera, etc...), automatically closing and electric sliding doors, LED high-performance daytime running lights and much more. The living room equipment is also fully configured and includes a 100 Ah LiON battery, 230W solar system, electric valves for waste and drinking water, a digital display with control of all electrical devices, etc.

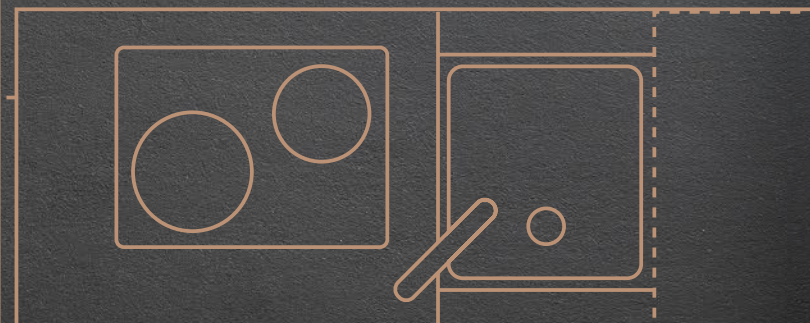

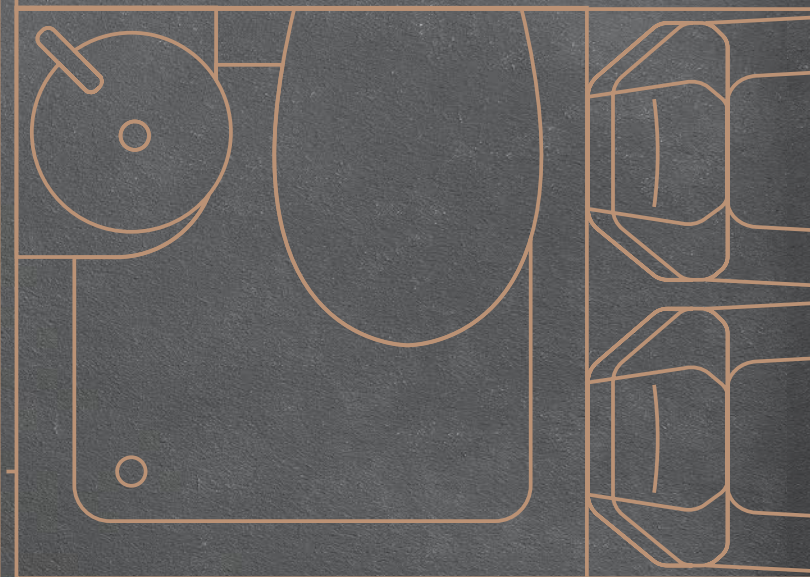

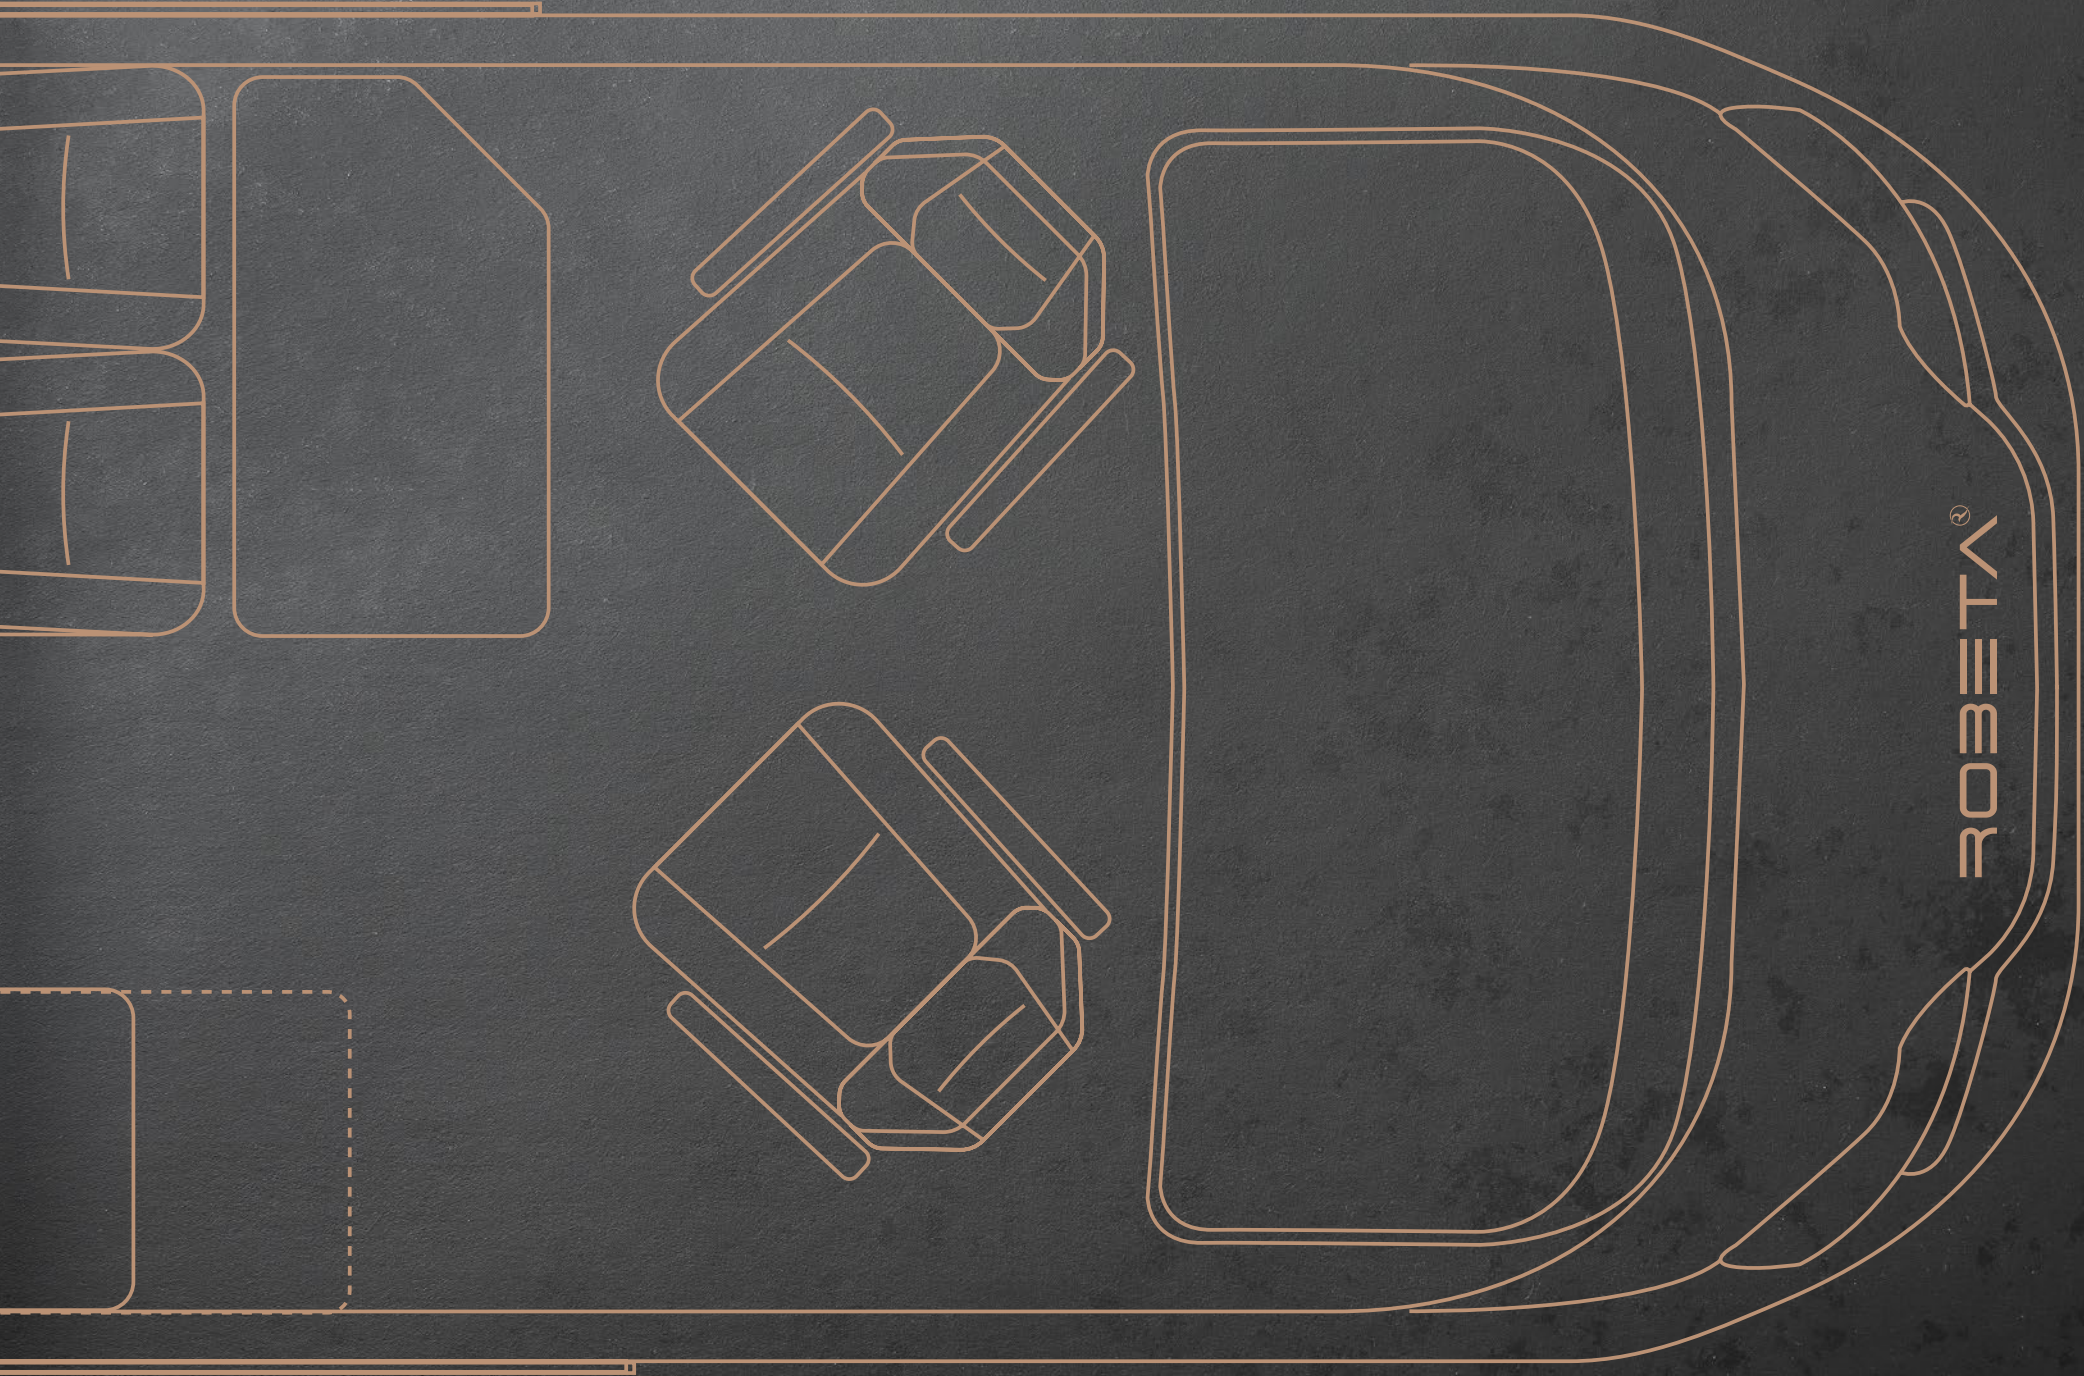

FULL OF INNOVATIONS

The model contains a lot of innovations, it is necessary to emphasize the kitchen counter made of real Kerrock and the "hidden" sink.

The bathroom with innovative 180-degree double-leaf glass doors, which allow a completely new perception of the use of the bathroom space, where at the same time the left door leaf also serves as a night partition between the living and sleeping areas.

It is also necessary to mention a huge number of designer solutions, as well as the toilet electric ceramic shell, which works according to the "macerator" system with its individual waste tank, seen on larger and more prestigious yachts.

ROBETA®

It's time to remember who you were before
the world told you who you should be?

It's time to **#RECLAIM YOUR FREEDOM**

ROBETA LINE OVERVIEW

These versatile and stylish vehicles are perfect for those who love to explore the great outdoors while still enjoying all the comforts of home. Whether you're planning a weekend getaway or a longer road trip, our caravan campers offer the perfect blend of practicality and luxury. DIONYSUS

It is an ideal travel vehicle for 2 people who want spaciousness and comfort. Due to the flexible bed in the rear part of the vehicle, which can also be changed into a seating position (lounge function), the vehicle can become a real apartment on four wheels. In the back of the vehicle, you can host up to 6 people during the day.

ROBETA®

ARES

With its length of 5.41m, (which is just a little more than a passenger car) 4 seats, and thoughtful distribution of space, the Ares is the perfect all-rounder for everyday use and your long discovering wanderings.

At only 5.41 m, it offers a double bed with the ROBETA LOUNGE function, a bathroom with a shower, a fully equipped kitchen, and a seating group for four.

5,41 m

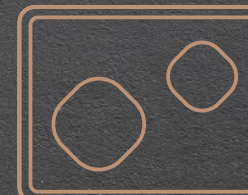

2,55 m

ROBEETA®

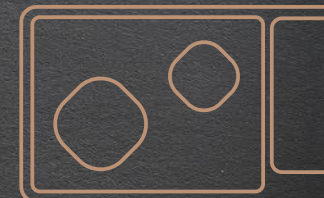

HELIOS

With its length of 5.99 m, it is not only an agile vehicle but also a very spacious one. Only a handful of vans shorter than 6 m can offer a 1.78 m wide and 1.87 m long bed, which gives you a comfortable place to read, daydream and relax.

Helios also offers plenty of space for storage and all your travel equipment. Based on the individual preferences of customized accessories, it is a truly versatile family vehicle and your ideal choice.

KRONOS

The Kronos model is one of the few vehicles measuring 5.9 m in length on the European market, which has 2 beds(1.95/1.85 m) positioned in the direction of traveling and therefore offers perfect comfort in the rear part of the vehicle.

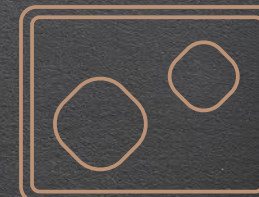

With 4 seats, this vehicle is the right companion for your travels and everyday trips. Kronos guarantees you complete freedom and pleasure! In most cases, it is the best vehicle for 2 people, but it can host up to 4 people without any problems.

Robeetv®

APOLLO

With its length of 6.36 m, the Apollo is the longest model of the Robeta vehicle on the Citroen and Fiat platforms. Due to the long family bed in the sleeping area, which measures 2.1 m in length, easily convinces even the most demanding customers who pay special attention to sleeping comfort. The trunk under the bed is very flexible, it can also be divided and adapted to your luggage and additional needs.

It offers numerous user-friendly functions, flexible kitchen accessories, and virtually unlimited customization options.

ROBETTA[®]

VERSIONS

FAMILY	64
FOR TWO	66
BIKE EDITION	68

FAMILY

Available for models: **Ares, Helios, Apollo**

Perfect family fun in a motorhome, with two comfortable beds, always ready to sleep four in it.

With the Family option (bunk bed), which in the sleeping area has a lower bed at a height of 0.4m, and an upper fixed bed between which there are more than 0.55 meters of height, the Ares, Helios, and Apollo models become a real family vehicle for 4 people. With a double bunk bed, we avoid the time-consuming conversion of a bench and table into an emergency bed, as we always have the right bed at hand.

In the Robeta Family models, the upper bed is not led to by an awkward ladder, which hinders access to the lower bed and which always causes problems with storage, but we have developed the ROBETA ELEVATE system for you - a system of pull-out stairs that also serve as a nightstand.

FOR TWO

Available for models: **Helios & Apollo**

Maximum comfort and freedom for two passengers

It is a customized version of the basic versions of Helios and Apollo. It represents the most comfortable and luxurious travel option for 2 people. This variant does not have a front bench seat, but instead, the user of this version gets an additional wardrobe, a counter with drawers, and a technically perfect rotating table for 2.

The "for two" option thus transforms Robeta into a luxurious and spacious oasis for 2 people. If you prefer to travel as a couple and do not want to accept compromises, this vehicle is a perfect choice.

BIKE EDITION

Available for models: **Ares, Helios, Apollo**

With a lower bed in the sleeping area and an electrically adjustable upper bed, 4 beds in total, and the possibility of storing 2 bikes transversely in the back, the Bike Edition is the ideal everyday hybrid.

ADD-ONS

ELECTRIC LIFT BED	64
POP UP ROOF	66
ROBETA 4X4	68

ELECTRIC LIFT BED

With the possibility of lifting and lowering of the bed, we can additionally use the lower space for a wide variety of additional travel equipment, from bicycles to small scooters or larger items for transport!

ROBETA POP UP ROOF

On all models and variants of our Robeta vans, you can also optionally have a luxurious Robeta retractable roof.

The retractable roof allows for an additional double bed, of dimensions 1.45m x 2.20m with a quality mattress, USB connections, LED lighting, a clock, and additional storage spaces.

Access to the pop-up roof is made possible by an elegant extendable ladder, which when not in use is easily stored in the dedicated storage space above the driver's cabin. Let your imagination run wild, where the Robeta retractable roof, in addition to sleeping comfort, can be useful as a multifunctional space for children to play, wonderful views of the landscape, through 3 large openings, or just for reading a book.

ROBETA 4X4

Robeta Citroen Jumper models are available with 4X4 Dangel four-wheel drive. A 4x4 camper van is the ultimate vehicle for adventure and exploration. With its rugged, off-road capabilities and comfortable living space, it's the perfect way to escape the hustle and bustle of everyday life and hit the open road.

Whether you're heading out on a solo road trip or setting off with a group of friends, a 4x4 camper van has everything you need to enjoy a comfortable, self-sufficient journey. The lightweight construction of the "Air" furniture allows driving on all surfaces without weight problems.

MATERIALS AND COLORS

At Robeta, the customer is always in charge, as he can decide for himself whether he wants to upgrade to the bouncy Frenchman - Citroen Jumper or the temperamental Italian - Fiat Ducato. In addition, the customer has the option of choosing between different exterior colors and color combinations of furniture and upholstery.

For an exclusive look and for those who want to upgrade the interior, a set of genuine leather upholstery is also available. Already in the standard version, the buyer can choose between four different graphic exterior paintings of the motor home.

THE ART LINE

The ART line impresses with its beautiful details and luxurious appearance. It boasts plenty of storage surfaces, drawers, and usable space. Innovative solutions in the field of usability, spaciousness, and manufacturing quality complete its sophisticated impression.

- KITCHEN ELEMENT WITH MULTIPLE DRAWERS
- HANGING CABINETS WITH PRINTED LOCKS AND DAMPERS
- GLASS CABINET IN THE KITCHEN BLOCK
- HANGING TABLE IN THE DINING ROOM

THE STYLE LINE

The STYLE line impresses with its clean, modern design, characterized by straight lines, slanted fronts on the hanging cabinets (without "push locks"), and a hidden system for closing and opening the cabinets. Usability is ensured by huge drawers and large storage areas.

The additional colors of the combination show a fresh style, which can be seen on the upholstery and furniture. In the Style line, in contrast to the Art line, the kitchen element is designed in the sense of allowing each customer the possibility for individual internal adjustment of two large pull-out drawers.

- KITCHEN ELEMENT WITH TWO LARGE DRAWERS AND A HIDDEN DRAWER FOR CUTLERY IN THE TOP DRAWER
- HANGING CABINETS WITH INCLINED FRONTS AND WITHOUT "PUSH LOCKS" (COMPLETELY SMOOTH SURFACE)
- GLASS DISPLAY (FOR GLASSES) IN THE KITCHEN BLOCK

BATHROOM TYPES

While a bathroom in a campervan may not be as spacious or luxurious as a bathroom in a traditional home, it can still be a comfortable and functional space. With careful planning and design, we can create one that meets your needs and helps you feel at home on the road.

Type 3

A compact bathroom found in the models Ares and Kronos is an ideal compromise between usability and size. It contains all the features found in bigger bathrooms (WC, shower, lockers, ...), but does not compromise the living space in the camper van.

Type 1

A prestige space with glass sink, chrome faucets, closed lockers and large mirrors, which visually emphasize the space. Bathroom TYPE I has also a comfortable toilet, through whole width of the bathroom.

Type 4

Bathroom with a comfortable toilet, through whole width of the bathroom and large rotating sink makes it the perfect solution for those who enjoy taking showers.

BIO dry separation toilet

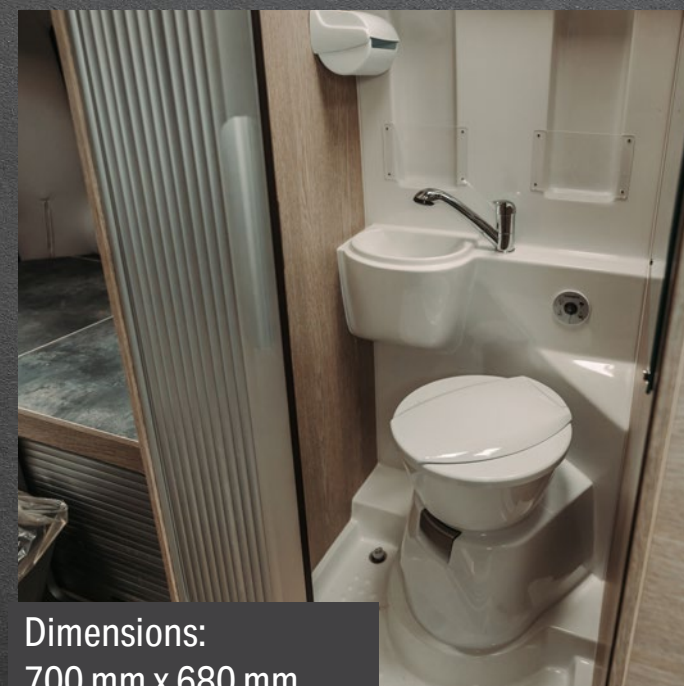

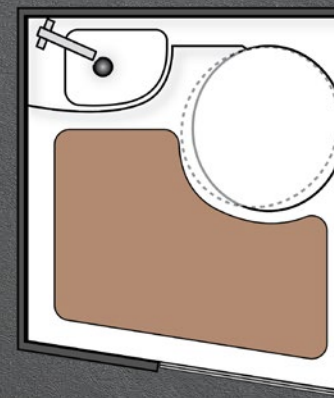

A dry separation toilet, is a convenient and hygienic way to dispose of waste while on the go. Unlike traditional toilets that use water to flush waste away, a dry separation toilet separates liquid and solid waste using a chemical process. This allows for easier and more environmentally friendly disposal of waste, as the solid matter can be safely disposed of in a designated area while the liquid is evaporated through evaporation or a chemical reaction. The compact size of a dry separation toilet also makes it a perfect solution for use in a campervan, where space is at a premium.

Technical guidelines

Robeta vans have a 7-year warranty on sealing and furniture (annual inspection) as well as 24-month vehicle guarantee, individual manufacturers' guarantee for technical devices.

The indication of dimensions and weight ranges from +/- 5% due to the use of natural raw materials. By installing, upgrading and modifying Robeta vehicles in unauthorized workshops, you compromise your safety and run the risk of losing your general operating license and Robeta warranty. For this reason, repair or upgrading should be carried out by an authorized Robeta specialist broker or dealer. Subsequent, technically feasible alterations and upgrades require additional installation and require additional costs. As a last resort, additional desired combinations may be mutually exclusive. Robeta reserves the right to make technical changes to its construction, colour and fittings to the extent that this brings technical improvement. The content corresponds to the state of print preparation in January 2023.
